NEBRASKA AT-A-GLANCE

March 2013

Prepared by:

Logan Seacrest
Research Analyst

INTRODUCTION

This first edition of Nebraska At-A-Glance ranks Nebraska in a variety of metrics – from economics to education to taxes. It is designed to provide policymakers and the public with a snapshot of Nebraska compared to other states.

We hope this report can be used as a quick reference or starting point as you delve deeper in policy areas important to you, your districts, and the State of Nebraska. To assure uniformity across states, the data used in this report comes from the U.S. Bureau of the Census and other national databanks.

It is our intent to issue this report biennially. To that end, we encourage feedback from legislators, staffers, and the public, on how to improve this report in the future. We hope you find it useful.

Special Thanks to:

DATA & SOURCES

The data in the tables, graphs, and maps contained in this report use the most current information available for all 50 states, and in some cases, the District of Columbia. Often, per capita figures are used to account for population differences between states. Source information is located at the bottom of each page, including a link to the raw data. When a ranking was determined using multiple data sets, both sources are listed.

States are ranked from highest to lowest unless otherwise noted. Two states with the same value are generally given the same ranking. However, values are displayed only to a certain decimal place, so states may appear to have the same value, but different rankings because their actual values differ. For each table, the 50-state average was calculated by summing each state's value and dividing the result by the number of states in the table.

Most rankings also include a line graph showing Nebraska over time, a bar graph comparing Nebraska to the national average, and a map illustrating how states rank in comparison to the national average. Bulleted text includes supplemental information about the subject, including definitions, additional rankings, and more detailed data.

• Race and ethnicity in the United States Census is based on self-identification. Respondents choose the race or races with which they most closely identify, and indicate whether or not they are of Hispanic or Latino origin.

• This ranking is based on the inverse of total respondents who self-identify as “Non-Hispanic Whites.”

ECONOMICS

GROSS DOMESTIC PRODUCT

 = 17TH

Nebraska Per Capita Gross Domestic Product (Dollars)

Per Capita GDP (Dollars)

• GDP is the market value of goods and services produced by the labor and property located in a state.

Nebraska Real GDP (Billions)

• Nebraska is ranked 37th nationally with a real GDP of \$89,785,999,360, comprising 0.6% of total U.S. GDP.

Average Composite ACT Score of Nebraska Students

Average Composite ACT Score

- The ACT score range is 1 to 36.
- 1.6 million 2011 U.S. high school students took the ACT test.
- The percentage of high school students taking the ACT varies from state to state. For example, all 11th grade students in Colorado, Illinois, Kentucky, Louisiana, Michigan, Mississippi, Tennessee, and Wyoming are required to take the ACT, but in Maine, only 9% of 11th grade students took the ACT.
